

ecoBosQues®

SUSTAINABLE HARDWOOD INVESTMENTS

Product

The customer can choose between a batch of 10+2 trees of Teak, or Oak. It is a long term investment in tropical hard-woods, in which the customer can sell the trees at any moment. Price per batch is 3.500€ for Teak and 3.300€ for Oak (taxes included).

The excellent climate conditions, and the greatest care taken over our ranches, provide a high return on the investment in only 16 years.

Ecobosques rewards its customers with 2 extra trees as a Loyalty Bonus, 1 tree on the 8th year and another one on the 16th, both of the same species and age of the current batch.

We take great effort to get our customer's full satisfaction by keeping them continuously informed and developing new products such as retirement plans based on trees.

Warranties

Ecobosques, is a Leading European company in tropical hard-wood production in Spain. Our share capital of €2.700.000 is fully paid, lack of debts, and expenses and all investments totally forecasted and self-financed until the wood harvest. We own 4 ranches in Costa Rica and 5 in Argentina, all of them under our property and free of debts and encumbrances. For better assurance, we hold an audit since the beginning of our activity provided by BDO Audiberia.

For you peace of mind, we warranty a 100% co-investment to provide you always with a backup warranty by duplicated planting in other ranches the same quantity and species of trees purchased.

All of our ranches are constantly supervised by forestry and agricultural engineers. Our insurance covers fire casualties. We manage over 1.000 hectares, with more than 100.000 already planted trees and 65.000 held in our own certified nursery.

Return

Due to the decreasing supply and the rising demand on hard-woods, investing in hard-woods is the best investment option of future.

Hard-woods prices historically have raised its value, especially in the past years.

According to Chicago Mercantile Exchange, in the past 80 years, wood prices have increased 2% over the rest of raw materials.

Investments in hard-woods counts besides a high return, a low taxing percentage since it is considered as real state and therefore a great refuge value.

EcoProduction

Corporacion Ecologica y Bosques Tropicales S.A.

(ecoBosques) is a company with a high public compromise to respect the environment. We consider it as a fundamental asset to the sustainable development of its activities in the short and the long run.

Among our goals is the sustainable social development, by promoting projects of this kind with local authorities. In the same way, we act with total respect to local and international regulations.

Our activity carries an important carbon sinks of greenhouse gases (GHGs), which now is being regulated to compensate industry emissions and services of developed countries.

Our plantations are being supervised by organisations such as AIDIMA (Wood Technical Institute) in order to obtain the maximum quality of the wood as well as to meet with the requirements of the Forest Stewardship Council (FSC), so that all of our production carries its official stamp and warranties the handling responsible of all forest in the world.

The ranches from Ecobosques are located in natural environments. That is the reason why invite our clients to visit them by organising tourist plans with trips to our plantations, natural parks, rivers and falls such as Iguazu (close to our ranches)

ecoBosques

Invest in fast growth hardwood trees of high economic value.
